PROFESSIONAL SUMMARY

Multimedia Engineer focused on mobile and web development. Hands-on experience building Android apps with Kotlin and Jetpack Compose, Laravel/PHP backends and cross-platform solutions with Flutter. Interested in mobile/web development roles in Medellín, Rionegro or remote. Combines a solid technical foundation with an eye for design and experience on nationally recognized video game projects.

EXPERIENCE

Mobile & Web Developer
2025 – Present
Famii

- Developed the Android mobile app with Kotlin and Jetpack Compose.
- Built and maintained the Laravel backend (API, business logic and database).
- Managed and maintained the corporate website famii.co (content, stability and technical support).
- Worked across the full product cycle: development, testing and feature deployment.

Audiovisual Production Assistant
2024
Student Wellbeing Office — Universidad Simón Bolívar

- Supported audiovisual content production for the Student Wellbeing Office's social media.
- Took part in shooting, editing and delivering institutional communication pieces.

Game Developer (university projects and national calls)
2021 – 2024

- Vertical-i / Minciencias (2023–2024): programming and game design for "El Tesoro del Prejuicio"; the team won the national call and received co-funding after incubation.
- GameJam Caribe 2023: member of the team that won the Visual Art and Narrative categories.
- Question Quest (2021–2022) and Liquid Maze (2024): programming and game design in Unity/C# as university projects (Unisimón).
